Attachments: [TCVP Pet product application rates, collars.docx](#)

Jeff, Joe –

We are sending the attached table in case it can aid Hartz is providing some of the information that we discussed on Wednesday, June 3. The attached use profile table is based on the current registered labels for all of Hartz's TCVP pet collars and shows the starting application rates that HED has been using for all the collars. As a way of illustrating what Hartz is proposing to change and how the starting rates are impacted, feel free to edit this table to add information specific to each collar. This may also assist us in calculating risk estimates for redesigned collars. If you have any questions before our discussion on June 11, please let me know.

Thank you,
Trish

Excellent!

Thanks Trish!

Happy Thursday!

Jeff

Jeff, Joe –

Thank you for your time yesterday. On Monday I sent values from May 20, but with our frequent discussions over the past few weeks we have been trying to review those estimates accordingly. Please let us know if the attachment addresses your question during our call yesterday about a discrepancy in the estimates. Apologies for any confusion.

Thank you,
Trish
